SAS Programming 1: Essentials

David Espinola, MS

Business Intelligence Analyst | Data Analytics | SAS, SQL, Tableau Expert | Fraud Detection & Compliance Specialist | Transforming Data into Actionable Insights
San Antonio, Texas, United States

Summary

I specialize in transforming raw data into actionable insights that drive business success. My expertise spans the full spectrum of the data analysis process—from gathering requirements and writing efficient SQL queries to validating datasets and creating engaging dashboards that enable faster decision-making for senior leaders. With proven results in fraud detection, geospatial analytics, and process automation, I am passionate about delivering measurable value and ensuring organizational goals are met efficiently and effectively.

Highlights include:

- Automated daily reporting workflows via Tableau, saving countless hours of manual labor and enhancing visibility for decision-makers.
- Increased company revenue through advanced geospatial analytics, optimizing business decisions on branch location and customer segmentation.
- Developed repeatable processes by scripting previously manual workflows, improving efficiency and accuracy across organizations.

Outside of work, I enjoy weightlifting, running, solving puzzles, building Legos, traveling, and exploring new cuisines. If any of this resonates with you, let's connect!

Experience

USAA

Business Intelligence Analyst I(Mid-Level)
February 2026 - Present (6 months)
San Antonio, Texas Metropolitan Area

Citi

2 years 2 months

Business Analytics Lead Analyst(VP)

July 2025 - February 2026 (8 months)

San Antonio, Texas, United States

Business Analytics Senior Analyst(AVP)

January 2024 - July 2025 (1 year 7 months)

San Antonio, Texas, United States

- Developed complex SAS scripts utilizing variable simulation to evaluate fraud detection approaches, consolidating rules to eliminate ~5% of rule pages and reduce storage utilization.
- Automated SAS reports to ensure fair lending compliance, saving 4 hours per month and mitigating potential litigation by identifying and addressing rule discrepancies for U.S. territories across 25+ fraud models.
- Built fraud models in SAS Fraud Management, leveraging transaction data to identify patterns like account takeovers, synthetic fraud, and third-party fraud, saving over \$500K in the first year.

Texas A&M University-San Antonio

Senior Data Analyst

August 2021 - January 2024 (2 years 6 months)

San Antonio, Texas Metropolitan Area

- Created automated Tableau dashboards for daily enrollment reporting, replacing manual SQL and Excel workflows to save 3+ hours weekly and streamline updates for 30 stakeholders, including senior leadership and budget teams.
- Managed Tableau Server with 10 dashboards, including 5 automated reports, enabling instant access for senior leaders and saving several days of decision-making time per semester.
- Authored SQL scripts to automate IPEDS reporting, reducing preparation time from weeks to hours, and redesigned the university Factbook's data sources for 6 dashboards, saving weeks of preparation time per semester.

Alamo Colleges District

3 years 8 months

Senior Data Analyst

May 2020 - August 2021 (1 year 4 months)

San Antonio, Texas Metropolitan Area

- Rewrote SAS scripts in SQL to migrate 23 KPIs to Tableau dashboards, saving \$20,000 in third-party costs and 100+ hours of contract labor.

- Mentored 3 junior analysts in advanced SQL (CTEs, window functions, subqueries), Tableau, and SAS (macros, loops), accelerating onboarding and enhancing team proficiency.
- Built predictive models in R, improving retention intervention accuracy by 20% and preserving revenue by reducing student dropouts.

Adjunct Professor

January 2018 - May 2020 (2 years 5 months)

San Antonio, Texas

- Designed and delivered college-level math courses using interactive iPad Pro notes and Zoom recordings, increasing passing rates by 30% above the department average
- Analyzed student surveys and performance evaluations to iterate teaching methods, increasing student engagement by 15%.
- Streamlined assignments with electronic grading, providing quicker feedback and improving completion rates by approximately 20%.

Wells Fargo

Senior Data Analyst

December 2019 - May 2020 (6 months)

San Antonio, Texas

- Developed SQL queries to optimize call center metrics, including ASA, NPS, and AHT, improving customer service efficiency by 20%.
- Built Call Center Analytics dashboards in Tableau, consolidating 10 Excel reports into a centralized platform, saving 5-10 analyst hours and 2-3 decision-maker hours weekly.
- Onboarded and trained 3 employees in Tableau, SQL (Teradata/SQL Server), Python (via Anaconda and internal packages), and Wells Fargo systems, reducing onboarding time by 25% and increasing team productivity by 30%.

Frost Bank

Data Analyst

October 2016 - June 2018 (1 year 9 months)

San Antonio, Texas

- Curated prospecting lists using Teradata SQL, integrating Dunn and Bradstreet data with Salesforce CRM, enabling targeted relationship management and driving a ~10% increase in bank revenue.
- Leveraged ESRI Business Analyst and FDIC data to select sites for 15+ new branches, contributing to an estimated \$100M+ in new deposits and increased lending potential.

- Automated trade area analysis using ESRI Story Maps, replacing costly printed binders with a digital platform that improved resource utilization and data visibility for executives.
